FOR IMMEDIATE RELEASE

Coptersafety signs a service agreement with MINT Software Systems for the implementation of the market-leading training management system "MINT TMS."

KIEL, 27.02.2020 - MINT Software Systems, the leading manufacturer of training management solutions for the aviation industry, today announces the signature of a service agreement with Coptersafety, a helicopter training center located in Helsinki, Finland, for the implementation of the web-based training management system MINT TMS.

MINT TMS allows instructors and trainees online access to their training schedules, electronic grading forms, reports, learning materials, and other training-related data. It simplifies and optimizes the management of instructor allocation, classroom distribution and the planning and optimized flight simulator schedules.

"Our customer base was growing extensively during the past years and we were looking to enhance the effectiveness of our simulator training operations. We were looking for a modern, web-based, and highly configurable training planning and qualifications management platform. I believe with MINT TMS, we have found the perfect fit," says Erkka Suvikumpu, CEO at Coptersafety. "MINT will replace some of our legacy tools and will help to significantly increase the effectiveness and readiness of our entire training organization," he adds.

MINT TMS allows customers to optimize training workflows and speed up the entire training planning process with its outstanding scheduling capabilities. This unique web-based training and qualification management software help training centers all over the globe to significantly enhance the efficiency and the day to day life of planners, instructors and crews in training. The agreement with Coptersafety includes the delivery of the MINT hosted (SaaS) MINT TMS Premium Edition for training schedules, record management, e-grading, in-depth reporting and data analytics capabilities.

About MINT Software Systems
MINT Software Systems, headquartered in Kiel, Germany, with offices in Orlando, Florida, and Sharjah, UAE, creates innovative training and resource management solutions used by aviation players all over the globe. MINT's SaaS and onsite solutions employing the latest software technology, allowing efficient records and training schedules for crew, ground, and maintenance staff and guarantee trouble-free regulatory compliance with the AQP/ATQP programs of authorities like the FAA and EASA.

About Coptersafety
Coptersafety is an independent helicopter pilot training center near Helsinki-Vantaa Airport in Finland. The company was founded by a helicopter pilot to improve the safety of helicopter operations. With Coptersafety, you are choosing a training partner who cares about aviation safety and has the know-how, tools, and passion for delivering it. Everything we do is designed to genuinely improve safety and help you with your safety management and processes. We offer a full range of flight and mission training courses for Helicopter Emergency and Medical Services, Search and Rescue, Offshore, and Aerial Work professionals. We are currently operating with three different helicopter types (AW139, H125, and H145) and we are an Approved Training Organization (ATO).
To be truly able to share knowledge, experiences and best practices, all our instructors are also active pilots who fly in Search and Rescue, Offshore, Emergency Medical Services as well as Aerial Work and Law Enforcement missions.
